

COME LEARN ABOUT CLASSROOM WORKSHOP!

The Workshop Model is a way to organize your lessons and class time that is student centered. It maximizes student work and practice time, focusing on practice, growth, and reflection while minimizing the amount of time the teacher spends in the front of the classroom. The Workshop Model's focus on the student, allowing time for students to "get messy with learning," reflect on their learning, and pursue self-driven inquiry. *Not only that, the workshop might very well be the best classroom routine we have for building student independence an self-regulation.*

Implementing Writing Workshop In your Gr. 4-9 Classroom!

Interested in teaching writing in an engaging, differentiated 'workshop' style, incorporating choice and lots of time for reading?

Led by Laura Lancaster, learn how to effectively plan and use **class environment, routines and community** in your writing classroom to engage your students in the work that writers do! Templates for organizing and conferencing, and lesson ideas provided.

When: March 14th
Time: 3:45-5:30
